Newport Infant School— Art

Topic: Collage Poppy	Key Stage 1 Year 2	Strand: Collage

What should I already know?

- Collage is a technique where materials are stuck close to each other or overlapping to make a picture.
- There are lots of materials and they can look and feel different.

What I will know by the end of the unit

- Collage comes from the French term 'Papiers Colles'.
- All collages are a personal expression of art.
- Materials come in different forms and all look and feel different.
- The materials we used were card, tissue paper, coloured paper and wallpaper.
- I will choose materials carefully to reflect the colours within the poppy.
- Materials can be cut up in different sizes to fit in shapes or spaces using a scissor or by tearing.
- I will arrange materials neatly, following the lines and leaving no gaps.
- All materials have to be stuck down carefully with a suitable glue as they differ in thickness.
- I will choose a suitable glue for the materials I choose.
- I will create a poppy collage and evaluate about my final piece.

Examples of collages

Real life poppy

Collage poppy

Vocabulary

arrange	Put things in a neat order
card	A thick stiff piece of paper
collage	A technique used when assembling different materials to create art.
expression	The way an idea or opinion is shown.
French	The language used in France
material	Something that things can be made from.
overlap	Cover the edge a little
paper	A material made from a wooden fiber in the form of a thin sheet.
technique	The way in which a skill is carried out.
thickness	The measurement between the two sides of something
wallpaper	A paper used to cover walls.

Key Skills

- Use materials creatively to produce art
- Develop art and design techniques: colour, texture, shape, form
- Evaluate own creative work
