How to make your Pterodactyl puppet!

You will need:

- String
- Stick
- Holepunch
- Scissors
- Template

How to make it:

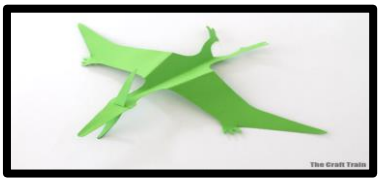

1. Fold your template in half and score. The harder you press the stronger it will be!

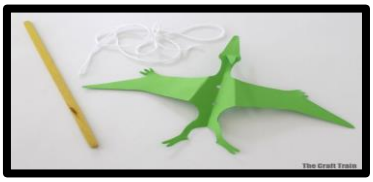

2. Fold both the wings upwards and score. Do them one at a time or you might get yourself in a muddle!

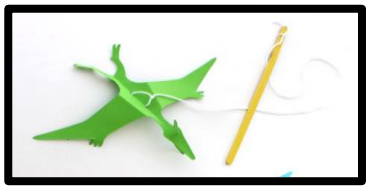

3. Feed the mouth through the slit in the head so the bottom half forms the mouth and the top forms the spike.

4. Punch two holes in the centre of the body along the fold line as this will keep it balanced.

5. Feed the string through the holes and tie. Tie the other end of the string to the stick.

6. Have fun playing with your pterodactyl at home! If you like you could add detail on the body and the wings to make it look life-like!
