How to draw a person

Weave your web.

Why do you think we might be learning to draw people?

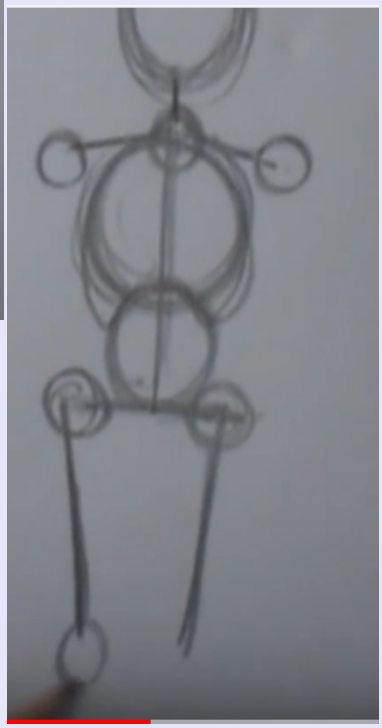

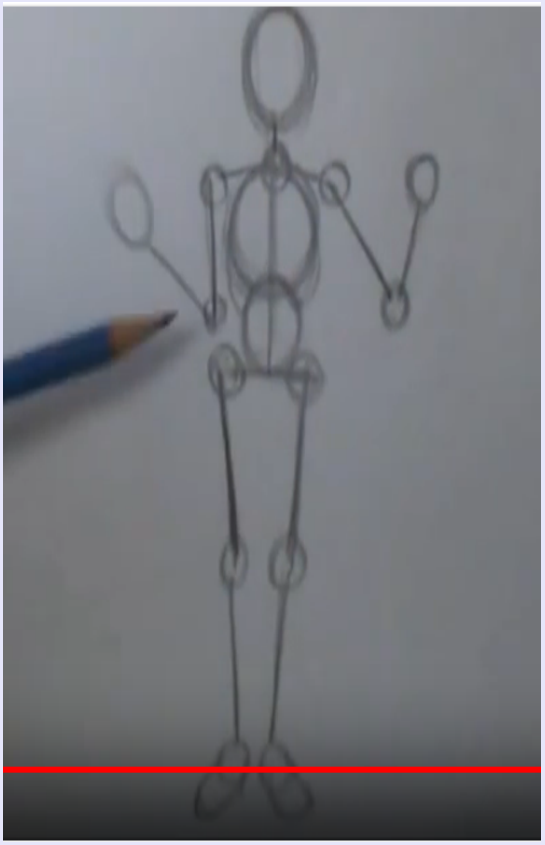

Today we are going to learn how to draw a person in a very realistic way, thinking about joints and different body parts !

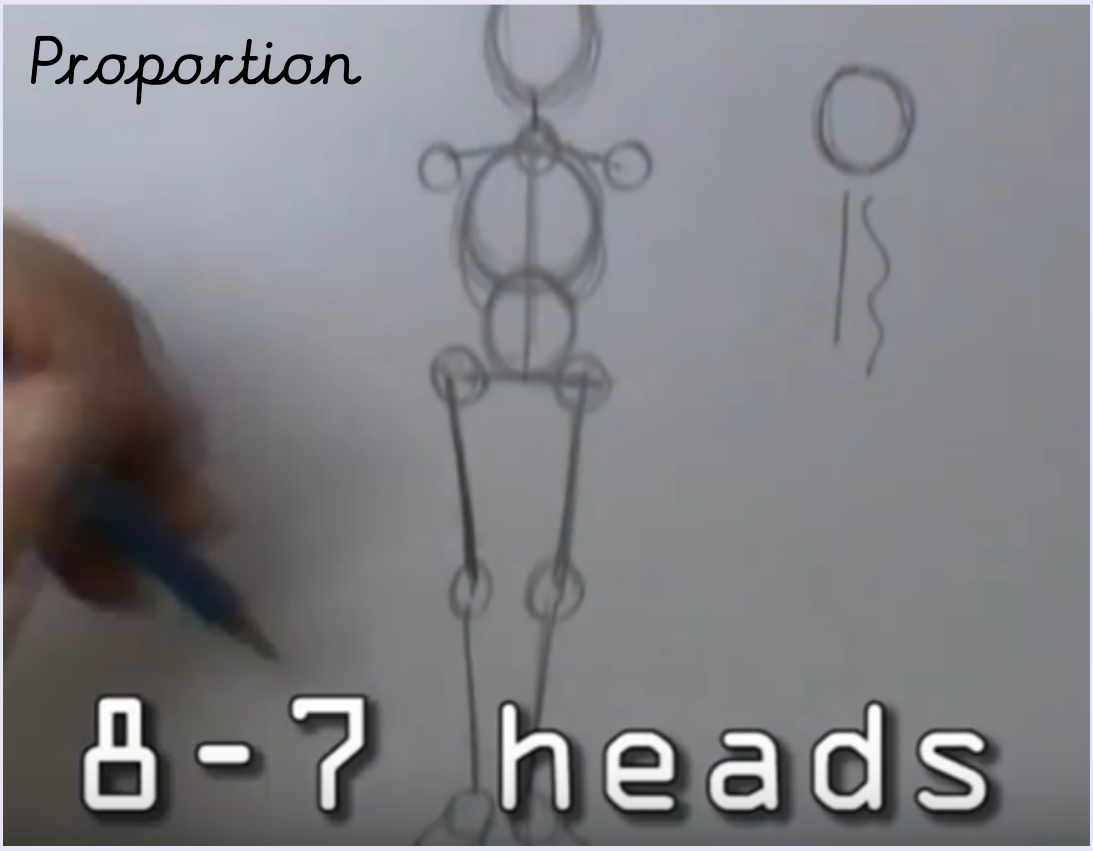

To help us do this we are going to use circles for the joins (moving body parts)

7-8 heads long for whole body, 3-4 heads for torso

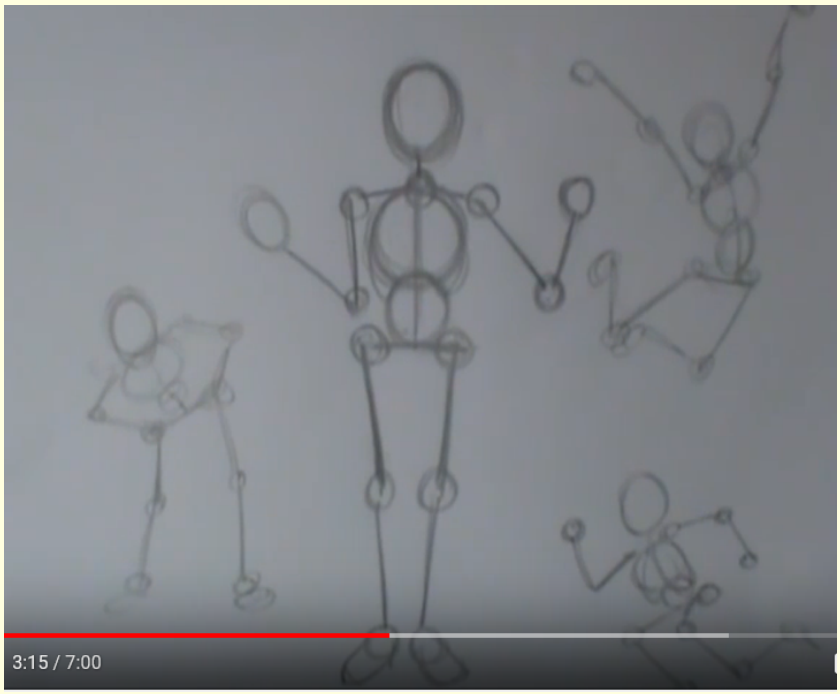

Let's have a go!

Note: Start from 1 minute 10 seconds.

What do you notice about these drawings? Why do they look like they are moving?
