

Madam Dragon's School of Dragons

Dear Children,

Oh how I have got myself in a muddle!

Every year I need to measure all of the dragon's tails and keep a record of how long they are and which dragon has got the longest and which one has got the shortest tail.

But silly me! I have drawn their tails but I have forgotten how to work out which is the longest and which is the shortest.

Ohhh what am I going to do!? I am in such a panic as you can see, I wonder if you can help me? I have got the drawings of each dragons tail here and I have sent copies to your teachers – I wonder if you could measure them for me and find out which Dragon has got the longest and which one has got the shortest tail.

I know I can rely on you to help me children,

Thank you so much!

Madam Dragon.
